Scholarship in the study of humor, and in particular the study of religion and humor, has gained increased attention in recent years. Dave Feltmate, who has specialized in developing this area of study from a sociological perspective, has kindly compiled a working bibliography to help guide students and researchers who wish to enter this area of study. The bibliography offered below is certainly not exhaustive and readers are encouraged to use this as a beginning point. Our hope in offering this bibliography is to encourage the further development of the study of religion and humor.
